

COMEC - FMOV 1500 6UF - CA2 - 2013

	Manufacturer: COMEC
	Type: FMOV 1500 6UF - CA2
	Year of manufacturing: 2013
	Parameters: working width (X) 1500 mm

Description:

COMEC - FMOV 1500 6UF - CA2 - 2013

- multifunctional multiple drilling machine with 10 multiple heads, arranged on 3 working lines, equipped with an automatic parts loader. The machine allows drilling of long workpieces up to 2000 mm in one working cycle

- working width (X) 1500 mm
- working depth (Y) 300 mm
- max. clamping height 70 mm
- top surface processing Yes
- horizontal processing Yes
- interchangeable aggregates Yes
- positioning Manual
- drilling feed Pneumatic
- clamping Pneumatic
- CE certification

- automatic parts loader Yes (synchronized with cycle)
- modularity & customization High
- cleaning & waste system Integrated, efficient
- PLC control with selection of work cycles

Main advantages:

- High productivity (synchronized automatic loading and multiple drilling units)
- Fast, precise operations with guaranteed repeatability
- Modular design with customization options
- Solid mechanical design and quality components
- Efficient cleaning, dust extraction and waste disposal system
- PLC programming with selection of work cycles
- Wide customization options and very reliable technology for industrial use even for multi-shift operation.
